(Rev. 10-90)  
NPS Form 10-900

OMB No. 1024-0018

United States Department of the Interior  
National Park Service

## NATIONAL REGISTER OF HISTORIC PLACES REGISTRATION FORM

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

### 1. Name of Property

historic name Appomattox River Bridge

other names/site number Route 24 Bridge; Structure No. 1002 (VDHR 006-0048)

### 2. Location

street & number Route 24 over the Appomattox River not for publication

city or town \_\_\_\_\_ vicinity \_\_\_\_\_

state Virginia code VA county Appomattox code 011 Zip 24522

### 3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1986, as amended, I hereby certify that this X nomination \_\_\_ request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property X meets \_\_\_ does not meet the National Register Criteria. I recommend that this property be considered significant \_\_\_ nationally X statewide \_\_\_ locally. ( \_\_\_ See continuation sheet for additional comments.)

Signature of certifying official \_\_\_\_\_ Date \_\_\_\_\_

Virginia Department of Historic Resources

State or Federal agency and bureau

In my opinion, the property \_\_\_ meets \_\_\_ does not meet the National Register criteria. ( See continuation sheet for additional comments.)

Signature of commenting or other official \_\_\_\_\_ Date \_\_\_\_\_

State or Federal agency and bureau

### 4. National Park Service Certification

I, hereby certify that this property is:

\_\_\_ entered in the National Register

\_\_\_ See continuation sheet.

\_\_\_ determined eligible for the  
National Register

\_\_\_ See continuation sheet.

\_\_\_ determined not eligible for the National Register

\_\_\_ removed from the National Register

\_\_\_ other (explain): \_\_\_\_\_

Signature of Keeper \_\_\_\_\_

Date of Action \_\_\_\_\_

U. S. Department of the Interior  
National Park Service

Appomattox River Bridge  
Appomattox County, VA

### 8. Statement of Significance

---

**Applicable National Register Criteria** (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- X A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- X C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield information important in prehistory or history.

**Criteria Considerations** (Mark "X" in all the boxes that apply.)

- A owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or a grave.
- D a cemetery.
- E a reconstructed building, object or structure.
- F a commemorative property.
- G less than 50 years of age or achieved significance within the past 50 years.

---

**Areas of Significance** (Enter categories from instructions)

Transportation, Architecture

**Period of Significance** 1930 - 1955

**Significant Dates** 1930

**Significant Person** (Complete if Criterion B is marked above)

**Cultural Affiliation** N/A

**Architect/Builder** William R. Glidden, Designer  
Virginia State Highway Commission, Builder

**Narrative Statement of Significance** (Explain the significance of the property on one or more continuation sheets.)

---

**Paperwork Reduction Act Statement:** This information is being collected for applications to the National Register of Historic Places to nominate properties for listing or determine eligibility for listing, to list properties, and to amend existing listings. Response to this request is required to obtain a benefit in accordance with the National Historic Preservation Act, as amended (16 U.S.C. 470 et seq.).

**Estimated Burden Statement:** Public reporting burden for this form is estimated to average 18.1 hours per response including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding this burden estimate or any aspect of this form to the Chief, Administrative Services Division, National Park Service, P.O. Box 37127, Washington, DC 20013-7127; and the Office of Management and Budget, Paperwork Reductions Project (1024-0018), Washington, DC 20503.

**Appomattox River Bridge  
Appomattox County, VA**

---

**7. Summary Description:**

The Appomattox River Bridge is a unique example of the common single-span, T-beam, non-arched concrete bridges constructed in Virginia from the early 1900s to the 1960s. Concrete slabs and T-beams became the predominant bridge types in Virginia by the 1930s with all bridge elements following standard Virginia Department of Highways plan elements.<sup>1</sup> Built in 1930, the two-lane Appomattox River Bridge has unique cast-in-place concrete rails incorporating stylized designs recalling the Confederate battle flag and the stars and stripes of the Union, with concrete obelisks at the four corners.<sup>2</sup> The bridge carries Route 24 across the Appomattox River in the Appomattox Court House National Historical Park.

**Detailed Description**

The Appomattox River Bridge (Structure No. 1002) is located in the Appomattox Court House National Historical Park, near a sign declaring “Appomattox, where our nation was reunited.” The bridge carries Route 24 over the Appomattox River and bisects the Appomattox Wayside. The commemorative bridge is a single-span, T-beam, non-arched concrete structure built in 1930. The bridge is 33 feet in length, 38 feet in overall width and stands 11 feet above the river. One bridge rail measures 32 feet 6 inches in length and 3 feet ½ inch in height and consists of three sections of nine specially designed panels. A section measures 10 feet 5 inches and a single panel measures 3 feet 1 ¾ inches. Four 12-inch posts separate the sections. Each section is comprised of three alternating panels displaying stylized designs recalling the Confederate battle flag and the Union’s stars and stripes flag. The crossed bars of the battle flag design measure 6 inches in diameter and contain five stars measuring 4-1/2 inches in diameter. Three 4-1/2-inch stars pierce a 7-inch horizontal bar over five vertical “stripes” recalling the Union flag. One “stripe” measures 2-7/8 inches. The four concrete obelisks rest on a 9-foot base on top of the bridge abutments and stand 3 feet 6 inches tall. Each obelisk measures 16 inches in diameter at its base, tapering to 9 inches at its pyramidal head.

Between 1970-1971, the bridge was widened from 30 feet to 38 feet to accommodate increasing traffic. The design of the bridge was preserved as much as possible by removing the original 1930 railings intact, and resetting them. The four concrete obelisks and end posts were recast, replicating the originals.<sup>3</sup> Remnants of a white plaster coating were discovered on the star points when the railings were removed for the widening. The purpose of the coating is unknown, and there is no

**United States Department of the Interior  
National Park Service**

**National Register of Historic Places  
Continuation Sheet**

**Appomattox River Bridge  
Appomattox County, VA**

record of similar coatings on any other bridge.<sup>4</sup> The ca. 1930 photograph (Exhibit A) portrays an isolated bridge illuminated by the white coating.

## **8. Statement of Significance**

The Appomattox River Bridge (VDHR 006-0048) is eligible for listing in the National Register of Historic Places under Criterion C for Architecture and Criterion A for Transportation, as an especially unique bridge constructed from standard plans using a common concrete bridge type constructed in Virginia from about 1910 until the 1930s. The Appomattox River Bridge (Structure No. 1002) was recommended eligible for listing in the National Register of Historic Places by the Historic Structures Task Group in November 1995, and confirmed by the Virginia State Historic Preservation Officer and the Virginia Department of Transportation's Commissioner on October 23, 1997.<sup>5</sup> The bridge retains a high degree of integrity from its original construction despite the 1971 widening.

### **Historical Background**

The earliest known reinforced concrete bridges constructed in Virginia date to the first part of the 20<sup>th</sup> century. Engineering advances in calculating the amount of reinforcing bar and concrete needed to carry loads safely were developed at that time which led to the implementation of standard plans for most of the common non-arched concrete bridge types.<sup>6</sup> Concrete T-beam spans are a very common bridge type and were constructed in Virginia starting in the 1910s. The first standard T-beam bridge plans in Virginia date from 1924, and T-beams were a dominant concrete bridge design from the late 1920s through the late 1960s. T-beams are easy to widen, however deck replacement is impossible.<sup>7</sup>

The specially designed Appomattox River Bridge and adjoining Wayside were built on the former Route 306 near the Appomattox Court House Surrender Grounds in 1930, the same year Appomattox Court House was designated a U.S. War Department Battlefield Site.<sup>8</sup> State Bridge Engineer William Roy Glidden is credited with designing the Appomattox River Bridge.<sup>9</sup> Copies of the 1930 plans for the bridge exist. It was constructed at an estimated cost of \$3,976.92. The superstructure's design estimated the use of 8,470 lbs of reinforcing steel, and 44.5 cubic yards of Class A concrete.<sup>10</sup> The 1971 widening of the bridge was completed at a cost of \$37,500.<sup>11</sup>

---

Of the seven pre-1950 non-arched concrete bridges in Appomattox County inventoried by the Department of Transportation, only the Appomattox River Bridge over Rt. 24 received a grade of A, signifying that the bridge has some unusual or distinguishing features or is a relatively uncommon type. A total of 99 bridges in Virginia were tentatively graded A. Of the 1,420 non-arched concrete bridges built before 1950, fewer than a dozen were found individually eligible for the National Register of Historic Places by the Historic Structures Task Group.

William Roy Glidden (1889-1969) was Virginia's first bridge engineer. Glidden worked for the highway department for 43 years until his retirement in 1959. A Massachusetts native, he earned a bachelor's of science degree in civil engineering from Massachusetts Institute of Technology in 1912. Before joining the Virginia State Highway Commission in 1916, Glidden worked for the Boston and Maine Railroad, the Massachusetts Highway Commission, and the Metropolitan Water and Sewerage Commission in Boston. Glidden was promoted to Assistant Chief Engineer for the Virginia Department of Highways in 1952. From 1954-1955, Glidden served as President of the American Society of Civil Engineers.<sup>12</sup>

Virginia's roadside development program was created in 1930 to "provide for the safety and comfort of those who travel our highways." Historical markers placed at important points along the highways required safe parking places for tourists and formed the beginnings of the wayside park system. The Appomattox Wayside was the first developed wayside park in the Commonwealth of Virginia. The Highway Department's Landscape Engineer, Howard J. Neale, professionally landscaped the wayside area around the memorial bridge. Neale's design included damming the Appomattox River to create a small reflection pool, further enhancing the uniqueness of the bridge. Confederate and Federal cannons were placed on both sides of the bridge to serve as interpretive features.<sup>13</sup>

In 1940, The National Park Service and the Virginia Highway Department began corresponding regarding the Appomattox Wayside. The Park Service requested that the wayside be turned over to the Appomattox Court House National Historical Monument. The Highway Department declined, citing potential changes to Route 24.<sup>14</sup> In 1950, Highway Commissioner J.A. Anderson offered to transfer the wayside to the Park Service, but was advised, "No lands may be added to the Monument... without Congressional approval." A 1951 letter from the Park Service to the Highway Department indicated that the Appomattox Wayside could be accepted under the authority of the Historic Sites Act of August 21, 1935, although Legislation would be needed to enlarge the Monument boundaries to include the wayside.<sup>15</sup>

**Section 8 Page 4**

---

In 1954, Superintendent Hubert A. Gurney of the Appomattox Court House National Historical Park wrote to the Highway Department suggesting the Appomattox Wayside be relocated to “a new site at any point west of the Appomattox River Bridge between your right of way on new Route 24 and the branch identified as Plain Run.” District Engineer J. H. Phillips opined in an internal memo that relocating the wayside “would be no improvement on the present location and... would be located away from the special design bridge which is one of the principle attractions of that wayside.” Both The Park Service and the Highway Department agreed to study the situation before a decision was made about the wayside.<sup>16</sup> In 1958, the Virginia Department of Highways deeded the Appomattox Wayside to the National Park Service.<sup>17</sup>

The Appomattox River Bridge remains in service today, undergoing periodic maintenance as necessary.

**Verbal Boundary Description**

Heading in a clockwise direction starting from the south end of the bridge and traveling 80 feet south; from that point measuring 140 feet from the center of the road is the first VDOT marker. Traveling 210 feet northeast from the first marker, bearing 32 degrees northeast is the second VDOT boundary. From the second boundary location, traveling 230 feet northwest, bearing 305 degrees northwest is the third VDOT boundary. From the third VDOT boundary, traveling southwest 210 degrees for 210 feet is the fourth VDOT marker. From the fourth VDOT marker, traveling 95 feet and bearing 112 degrees southeast to the center of the road.

**Boundary Justification**

The boundaries of the nominated parcel include the Route 24 Bridge and the Virginia Department of Transportation's right-of-way. There are no other contributing or non-contributing structures, buildings, or sites on the parcel.
